Education

Coventry University The Knowledge Hub

Ethical Hacking and Cyber Security

Sep. 2022 – May 2026

5th Settlement, New Cairo

Objective

- Detail-oriented IT professional with hands-on experience in IT support, system administration, and cybersecurity.
- Skilled in digital forensics, and penetration testing to enhance security and operational efficiency.

Experience

Jotun Abu Dhabi

IT Intern

August 2024 – Sept 2024

Abu Dhabi, UAE

- Assisted in IT support tasks, troubleshooting hardware, software, and network-related issues.
- Managed system updates, software installations, and user access configurations.

CIB Summer Internship

IT Intern

June 2025 – August 2025

- Supported daily IT operations by shadowing the IT team and assisting with routine system checks and user support tasks.

Projects

Secure File Access System / C, Linux, Sockets, Multi-threading, XOR Encryption

April 2025

- Engineered a multi-threaded server to handle multiple client connections concurrently with credential.
- Implemented role-based access control across three user levels, enforcing permissions on file operations with Linux.

Digital Forensics Investigation / Autopsy, Disk Image Analysis, Memory Forensics

March 2025

- Investigated a data leakage case by mounting and analyzing a disk image using Autopsy, with hash verification.
- Identified user activity including account logins, browser history, USB device usage.

Penetration Testing Engagement / Multi-Vector Exploitation, Privilege Escalation

January 2025

- Identified critical vulnerabilities across FTP, SSH, and metadata by simulating real-world attacks.
- Exploited weak configurations, exposed directories, and embedded credentials to gain unauthorized access.

Certificates

Cybersecurity Fundamentals — Information Technology Institute

august 2025 – September 2025

- Gained a solid foundation in cybersecurity principles, network security, and risk management, developing the skills to identify, assess, mitigate security threats in IT environments.

SprintX Cybersecurity Summer Camp — Microsoft

Jun 2024 – September 2024

- Completed an intensive cybersecurity training program covering ethical hacking, digital forensics, and cloud security concepts, enhancing understanding of modern cyber defense strategies and best practices..

Security Operations Fundamentals — Palo Alto Networks Academy

august 2024 – September 2024

- Earned a strong foundation in threat detection, incident response, and security monitoring, preparing me to support secure IT environments and SOC operations.

Technical Skills

Programming Languages: Python, C Programming Language, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code

Technologies/Frameworks: Linux, GitHub, Autopsy

Soft Skills

Languages: English , Arabic

Others:Adaptability Flexibility,Work Ethic Attitude,Leadership Management,Time Management

Others: Communication Skills,Interpersonal Skills,Problem-Solving , Critical Thinking,Collaboration,Works Under Pressure,Creativity and Time Management
